

VIRTUAL/HYBRID MEETINGS

Royal Productions
ENGAGE + EDUCATE + ENTERTAIN

Your full-service audio visual
production partner.

WHAT IS A VIRTUAL MEETING?

A virtual meeting is when people across a variety of locations, domestic or global, use video, audio, and text to link up online. Virtual meetings allow people to connect, share information and data in real-time without being physically located together. Much like in-person conferences, virtual conferences are built around a live, complex agenda that includes keynotes, sessions, breakouts, and more.

WHAT IS A HYBRID MEETING?

A hybrid event is a trade show, sales kick off, company training or other meeting that combines a "live" in-person event at a physical location with a "virtual" online component to share a message to the entire company when employees are not all gathered in the same place.

WHEN DOES A HYBRID EVENT MAKE SENSE?

If you answer YES to one or more of the questions below, a hybrid event could be the right solution for you.

Are some participants unable to attend your event in person?

Would some participants have to make a long journey to attend in person?

Does your company or event have virtual 'followers' (e.g. on Facebook, LinkedIn, or Twitter)?

Are some participants living/working abroad?

Would you like to document/record your event and preserve or reuse the information?

Would it be useful for you or your participants to be able to rewatch (parts of) the event later?
